## Description

If you are a seasoned developer, you know that it's important to keep up with the latest technology changes. This second edition of our best-selling title follows along with a lead ABAP developer as he learns how to employ tools and features new to recent ABAP releases. Experience the entire process of building applications - design, development, and testing of all areas - and walk away with a firm understanding of techniques and technologies that were not previously available. With this book, you're learn how to keep your ABAP fresh.

- Presents the most recent technologies and tools through the eyes of an ABAP developer
- Includes new topics like syntax enhancements, ABAP Test Cockpit, AJAX, SAP BusinessObjects BI integration, XML processing, Rich Islands, NWBC 3.0, and many more
- Covers an entire upgrade project from release 4.6C to 7.0 EHP2
