Agenda

- Project Overview

- Project Owners

- Design Thinking Process

- Scoping and Research

- New features: Auto Fill, Undo & Recover

- Project Screenshots & Demo

- Next Steps, Future Plans and Questions

Project Overview

- BT Libraries are small libraries housed in Community Centers in towns not serviced by Public Libraries

- The management of the books is an index card – manual-based system

- The Libraries are funded by grants and donations to the associated Community Centers

- The BT Library System received Bookshelf, an Open-Source Library Management System - there is no charge and no support provided

- The IT Manager is concerned about the quality and supportability of the system
